WEATHER OF CONCERN

Weather of Concern

*** Potential Critical Fire Danger and Excessive Heat ***

Southwest California:

- Potentially dangerous weather conditions are expected for Thursday, 07/05/18 through Sunday, 07/08/18 over southwest California.
 - Potential record breaking triple digit heat will likely lead to a risk of heat-related illness. Excessive Heat Watches and Warning are likely.
 - The very hot and dry conditions, coupled with gusty northerly winds will increase the risk for large fires.
 - Strong sundowner winds are forecast Saturday afternoon through early Sunday morning.
 - The Santa Ynez Mountains and Santa Barbara County south coast (through and below canyons and passes) are expected to experience wind gusts of 35-55mph, with isolated gusts to 60 mph.
 - Impacts: critical fire danger possible, dangerous cross-winds across Hwys. 101,154 and 192, potential for downed trees and power lines.
 - A large south swell will bring dangerous surf and rip currents

Southeastern California:

- Excessive heat is forecast for much of the region on Thursday and Friday; as Thursday, temperatures are expected to become brutal and extremely hazardous for southeastern California Thursday through Friday.
 - High temperatures are forecast to top out above 115 degrees for most urban areas.
 - Excessive Heat Watches and Warnings are very likely to be issued in the next few days.

WEATHER SYNOPSIS BY REGION

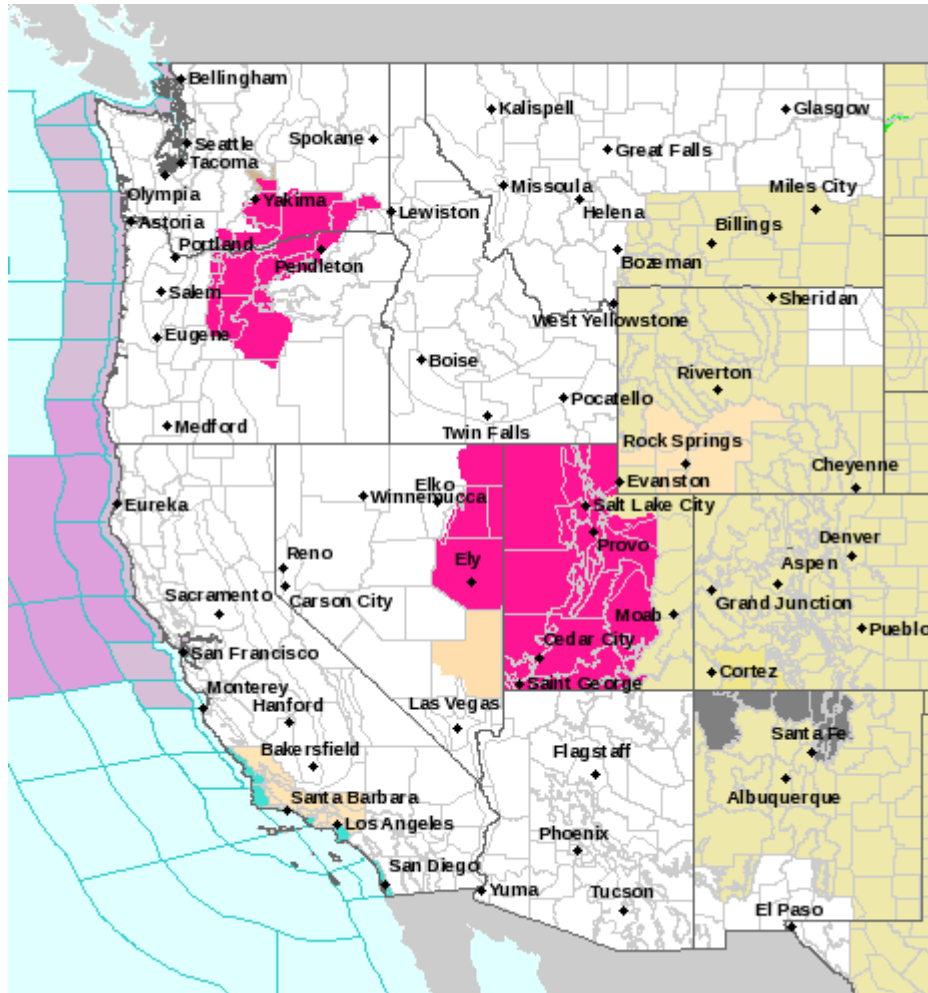

NORTHERN CALIFORNIA

Dry conditions and a cooling trend are forecast over the next few days. Smoke from the County Fire in western Yolo county will likely spill into the southern Sacramento and northern San Joaquin valleys this morning thanks to the onshore surface flow. Otherwise, generally stable conditions will bring fair skies today. Airmass continues to cool on Tuesday bringing down temperatures to just a bit above normal for this time of year. An upper low now in the Gulf of Alaska will dig southward into the eastern Pacific over the next couple of days deepening the trough off the coast and bringing still more cooling and continued onshore flow. By Wednesday, daytime highs should actually be a bit below normal.

SOUTHERN CALIFORNIA

Temperatures will hover close to the seasonal normal through the middle of the week. Potentially dangerous weather conditions are expected for Thursday, 07/05/18 through Sunday, 07/08/18 over most of Southern California. Potential record breaking triple digit heat is forecast; Excessive Heat Watches and Warning are likely. The very hot and dry conditions, coupled with gusty northerly winds will increase the risk for large fires. Strong sundowner winds are forecast Saturday afternoon through early Sunday morning for the Santa Ynez Mountains and Santa Barbara County south coast. A large south swell will bring dangerous surf and rip currents to Southern California coastal areas, as well.
